PAX WEST we couldn't miss it with our project of „Cyphers Game”

PAX WEST we couldn't miss it with our project of „Cyphers Game”

Pax West is the next edition of the largest international fair of game developers and representatives from the gaming industry. During this year's event, which will take place On September 2-5 in Seattle, WA, developers will showcase their creations as well as the latest games. It is also the perfect opportunity to meet the biggest players in the industry and show your projects to experts from around the world! During the 4 days, the organizers provided a lot of attractions for the participants, ranging from game exhibitors from around the world to panels and debates with experts, during which invited guests from the gaming industry will perform. Stands with the possibility to play countless games on consoles and pc, e-sports tournaments - for professionals and for beginners, and numerous cosplay shows. A wide group of participants, including investors and publishers, it will also allow you to establish business relationships and meet people with the same or similar interests! Of course, the Polish stand must not be missing at such a huge event. We are glad that we can once again cooperate with the Indie Games Polska Foundation and the Creative Industries Development Center. The IPN Office of New Technologies will be one of the exhibitors in the space dedicated to the Polish gaming sector. Once again, players from overseas will be able to break Bolshevik codes, saving Poland and Europe from the Bolshevik revolution! We look forward to welcoming you again, because let us remind you that the "Cypher Game" project had its premiere at the PAX East fair in Boston in April this year. The game was then appreciated by fair participants, and the IPN stand was visited by over 2,000 guests. The feedback we collected from players back then allowed us to improve our project. We have created something special and we are very proud that we can once again boast about our "Cypher Game" at one of the largest gaming events. By the decision of the Minister of Education and Science, Przemysław Czarnek, "Cypher Game" will be added to the curriculum as recommended content by the end of the current calendar year. In this way, it will become part of the educational program in Polish schools therefore teachers and students will have the opportunity to play it. The game can now be downloaded for free from the website of the Ministry of Education and Science or from the Steam platform (https://bnt.ipn.gov.pl/en/projects/games/cyphers-game/). Moreover, it is available in the Play Store and in the AppStore. The game works on VR goggles, PC with Windows and mobile devices supported by iOS and Android.
