Feel the atmosphere of educational games of the New Technology Division of the Institute of National Remembrance. Listen to stunning music

Feel the atmosphere of educational games of the New Technology Division of the Institute of National Remembrance. Listen to stunning music

Many factors influence the overall experience of the game. The most important ones include the game's playability, graphics, plot, and music. We invite you to listen to the musical compositions created for the educational games of the IPN's New Technology Division. Let yourself be carried away by the music.

Suite from "Aviators"

"Aviators – War in the Skies" is the latest gaming project of the New Technology Division, which had its international premiere on 24 January 2024. By mid-April, the game had been downloaded over 300,000 times. The plot is based on real events of World War II in which Polish aviators took part. The music for the game "Aviators – War in the Skies" was composed by the outstanding Polish composer Przemysław Treszczotka. It contains dynamic, thrilling, energetic compositions, as well as calm, mysterious, and melancholic ones. Przemysław Treszczotka was inspired by the works of Karol Szymanowski and Mieczysław Karłowicz, sometimes directly referring to the works of these composers. The soundtrack emphasises the warlike, sometimes heavy atmosphere of the game and complements the "Aviators" project in a fascinating way, making the game memorable. The soundtrack from the game "Aviators – War in the Skies" is available on YouTube. You can also listen to it on the website of the New Technology Division in the video tab. "Cyphers Game" soundtrack

The Institute of National Remembrance made its debut on the gaming market with its educational project "Cyphers Game". It is a game full of puzzles in which the player's task is to crack Bolshevik codes, ensure radio communication, and neutralise enemy armoured trains. The action of the game takes the player to 1920, during the Polish-Bolshevik war. The music created for this game enhances the aura of mystery, uncertainty, and mystery. Also created by Przemysław Treszczotka, it is an adventure in itself. There is no diversity here, which can be heard in the suite from "Aviators". The composer focused here on melancholic melodies and a slow, yet restless creation. It's music that's hard to break away from. The soundtrack from "Cyphers Game" is available on YouTube. You can also listen to it on the website of the New Technology Division in the video tab. Listen to the soundtrack from "Cyphers Game" https://www.youtube.com/watch?v=rzfiatBlGjE
