Educational classes in Szczecin with mobile boxes for immersive historical education

Educational Classes in Szczecin with mobile boxes for immersive historical education

Young people from Szczecin and surrounding areas had the opportunity to participate in educational sessions that used mobile cases with immersive historical education features. The Regional Office of National Education in Szczecin was responsible for organizing these history lessons.

Immersive history lessons in Szczecin

For students of the Youth Educational Center in Trzebież, the XVIII High School in Szczecin, and the St. Brother Albert Youth Sociotherapy Center, the Regional Office of National Education in Szczecin organized immersive history lessons. Altogether, nearly 50 individuals participated in the sessions. The students explored the mobile cases equipped with immersive historical education tools and tried out all of the educational games offered by the New Technology Division of the Institute of National Remembrance: “Pilots – War in the Skies,” “Cipher Game,” and “Warsaw Rising.” According to the participants' feedback, it was difficult to pinpoint a favorite, as each game was highly engaging, educational, and sparked a curiosity for further exploration of Poland’s modern history.

Sessions using mobile cases for immersive historical education

The mobile cases for immersive historical education are designed to conduct unconventional, immersive history lessons. This approach makes learning experiential, engaging, and combines education with entertainment. Learn more about the mobile cases for immersive historical education
