Final Gala of the “Historical Event of the Year” Competition

Final Gala of the “Historical Event of the Year” Competition

On September 24, the final gala of the “Historical Event of the Year” competition took place at the Museum of Polish History in Warsaw. Our initiatives — the educational historical game *“Aviators – War in the Skies”* and the nationwide project *“Mobile Stop: The History of the Future”* — after an initial selection by the jury, made it to the final shortlist and were subsequently put to an online public vote.

The New Technology Division Among the Laureates of the “Historical Event of the Year” Competition

Although we did not win the main award, reaching the final itself is a great honor and a success that demonstrates that the projects of the New Technology Division are recognized as some of the most interesting and innovative educational initiatives of the past year. We would like to thank everyone who voted for our initiatives. It is thanks to you that our projects were included among the best historical events in Poland.
