The IPN’s New Technology Division at the Bett Asia 2023 educational fair

The IPN’s New Technology Division at the Bett Asia 2023 educational fair

The Bett Asia educational fair brings together thousands of participants and hundreds of exhibitors from every continent. This year’s edition took place on 4 and 5 October in Bangkok, Thailand. During the conference, exhibitors from around the world had the opportunity to present educational innovations. There were also national stands promoting local and regional suppliers. It was a great opportunity to exchange experiences and inspiration on the international market, including recommendations regarding government and local government programs. We would like to thank the GovTech Centre for inviting the IPN’s New Technology Division to the Polish national stand, which was organised in cooperation with the Ministry of Education and Science and the EdTech Poland Foundation. The ceremonial opening of our national stand was performed by the Ambassador of the Republic of Poland in Thailand, Mr. Artur Dmochowski. At the fair, the New Technology Division presented two gaming projects: “Warsaw Rising: City of Heroes” and “Cyphers Game”. The presence of the New Technology Division at the Bett Asia international fair was another opportunity to meet and exchange experiences with educators and teachers. Especially for them, educational materials consistent with the MEiN core curriculum, lesson plans, and educational quizzes have been prepared, based on the immersive projects of the New Technology Division: “Cyphers Game”, “Warsaw Rising”, “Szybowcowa ‘87”, and “Testimony of help”. All materials can be downloaded free of charge at www.bnt.ipn.gov.pl
