CYPHERS GAME

Uncover the deepest hidden secrets of intelligence

It is the end of 1920. The Polish-Bolshevik war has been going on for almost two years. The battle for Korosteń – a key railway junction and technical-supply base – is underway.

Break Bolshevik cyphers, ensure radio communication and neutralise the fearsome armoured trains. Play on PC, mobile devices and VR goggles and become the hero of Polish radio intelligence.

Experience a true taste of victory

Everything you see has been created from the source material or accurately reproduced from historical exhibits. The players' missions are documented historical events, and each of the heroes has a different, crucial to the outcome of the battle, task.

Join the groundbreaking IPN gaming project. Take part in events that decided the fate of an armed conflict 100 years ago.
