Mobile chests with immersive history education visit high school in Podkowa Leśna

Mobile chests with immersive history education visit high school in Podkowa Leśna

85 students from Podkowiańskie High School No. 60 and 46 students from schools in Podkowa Leśna participated in the sessions. The youth had the opportunity to explore all the projects from the New Technology Division and take part in immersive history education

Immersive history lessons in high school No. 60

More than 130 students got a break from textbooks and gained historical knowledge through cutting-edge technology. Students from Podkowa Leśna took advantage of the mobile crates and explored the educational projects of the New Technology Division enhancing their digital competencies and deepening their understanding of immersive history education.

Expanding digital skills, learning history, shaping civic attitudes

The educational projects of the New Technology Division align with the national curriculum. They effectively enrich the presentation of history while fostering civic attitudes and empathy among young people.

Explore all educational projects of the New Technology Division on Steam

All the projects are available for free download on the Steam platform. They are also pre-installed and ready for use thanks to the mobile crates. We've ensured the wide accessibility of IPN's technology-driven projects in educational institutions.

Learn More About Mobile Crates with Immersive History Education

Podkowiańskie high school No. 60 embraces immersive history education thanks to the mobile chests, students and teachers in Podkowa Leśna experienced the benefits of immersive history education. The combination of fun and learning is no longer a mystery to them. We hope this experience will inspire further exploration of Poland's modern history through the educational projects of the Institute of National Remembrance.
