

Piła – the next stop of the “Cyphers Game” mobile showroom

Piła was the next stop on the road map of the “Cyphers Game” mobile showroom. On 20 September, in the area next to the Holy Family Parish, visitors could learn about the New Technology Division of the Institute of National Remembrance project and discover the secrets of Polish intelligence operating during the 1920 Polish-Soviet War. The exhibition attracted a lot of attention. Between 10 a.m. and 1 p.m., students from the Salesians of Don Bosco School Complex in Piła visited the showroom. Then Piła residents and guests enjoyed the attractions. Mr Piotr Orzechowski from the Institute’s Branch National Education Office provided a great deal of substantive support during the event, introduced the participants to the world of 1920 and answered many questions related to the history depicted in the “Cyphers Game”.

From 3 p.m., Karol Nawrocki, PhD, President of the Institute of National Remembrance; Magdalena Hajduk, Director of the New Technology Division of the Institute of National Remembrance; Father Kazimierz Chudzicki, parish priest of the Holy Family Parish; And Rafał Reczek, PhD, Director of the IPN Branch in Poznań, held a press conference in front of the mobile showroom for the local media.

We encourage to visit our mobile showroom and learn about the “Cypher Games” in your area!
