

The “Cyphers Game” as an attraction at the National Youth Dialogue Congress

Under the honorary patronage of Prime Minister Mateusz Morawiecki and the Minister of Family and Social Policy, the 2nd edition of the National Youth Dialogue Congress took place on 24-25 November at the ADN conference centre in the Warsaw Breweries: Explosion of the Young (“Eksploracja Młodych”). Minister of Family and Social Policy Marlena Małąg attended the event. The event’s organiser, the Youth Initiatives Foundation, provided – in addition to workshops and discussion panels – various attractions such as an evening of silent disco and visits to the Copernicus Science Centre and the Warsaw Rising Museum. There was a special VR zone on site, prepared by the Congress partners: Institute of National Remembrance and the ZHR Scout Volunteer Rescue Service. The scouts prepared a health zone with first aid training, while the New Technology Division was present in the multimedia zone, in which it presented the icaros human flight VR simulator and offered the possibility to explore adventure and history games, most notably the “Cyphers Game”. Our presentation caught the attention of the Congress participants, primarily high school students, but also guardians and teachers.

We are present where young people are talking about the future.
