

The mobile showroom promoting the “Cyphers Game” has embarked on a tour of Poland!

In September and October, the “Cypher Game”, a gaming project developed by the New Technology Division of the Institute of National Remembrance, will be presented in all regions of Poland.

The first stop of the “Cypher Game” mobile showroom after its inauguration in the Polish Parliament was Grunwaldzki Square in Gorzów Wielkopolski. Then, on 19 September, students from the Szarych Szeregów Primary School No. 2 in Gorzów and the Stefan Starzyński Economic School Complex, as well as from the People of Reconciliation Primary School No. 1 in Witnica, visited the showroom.

The game generated great interest among the residents of Gorzów Wielkopolski. Representatives of the educational sector, including the Superintendent of Education in Gorzów Wielkopolski, Ewa Rawa, and teachers, also had the opportunity to learn about the project. This is of paramount importance for the project because the Minister of Education and Science decided to add the “Cyphers Game” to the curriculum as recommended content by the end of this calendar year. This way, it will become part of the educational programme.

We encourage to visit our mobile showroom and learn about the “Cypher Games” in your area!
